

# MICHAEL BABBONI

Fairfield, NJ | (848) 480-3995 | [mikeybabboni@gmail.com](mailto:mikeybabboni@gmail.com)  
[linkedin.com/in/michael-babboni](https://www.linkedin.com/in/michael-babboni) | [github.com/skullmbones](https://github.com/skullmbones)

Computer Science graduate focused on full-stack and web development, with hands-on experience building deployed React applications, Java-based systems, Android apps, and database-backed user features. Skilled in React, JavaScript, Java, C, Supabase, Git, Agile workflows, unit testing, and technical documentation.

## EDUCATION

**Rutgers, The State University of New Jersey - New Brunswick, NJ**  
B.A. in Computer Science, Minor in Music Technology | May 2026  
Campus Involvement: RU COGS (Creation of Games Society)

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, TypeScript, C, C#, OCaml, Lua, R  
**Frameworks, Web & Databases:** React, JavaFX, Node.js, HTML, CSS, Tailwind CSS, Vite, Supabase, PostgreSQL, REST APIs  
**Developer Tools & Platforms:** Git, GitHub, Jira, IntelliJ IDEA, Android Studio, Gradle, Unity, Roblox Studio, Fabric API, FMOD  
**Software Engineering Practices:** Agile Scrum, Code Review, Unit Testing, UML, SRS/SDS Documentation, JavaDocs

## PROJECT EXPERIENCE

**Rooted**, Garden Planning App | January 2026 - May 2026 | <https://rooted-blush.vercel.app/>

React, Vite, Supabase, PostgreSQL, JavaScript, HTML, CSS

- Built and deployed a full-stack garden planning app allowing users to create, edit, save, and manage custom garden plots.
- Implemented an interactive drag-and-drop grid planner with persistent saved layouts, responsive UI behavior, and plant placement feedback.
- Integrated Supabase authentication and PostgreSQL tables to manage user profiles, garden data, plant selections, and saved plot configurations.
- Developed rule-based plant compatibility logic and API-backed recommendations to improve the garden planning experience.
- Collaborated in an Agile Scrum team using Jira, GitHub branches, pull requests, sprint presentations, and technical documentation.

**Adventure Catalyst**, Minecraft Mod | October 2025 - *present* | <https://adventurecatalyst.net/>

Java, Fabric API, Gradle, Git

- Developed custom Minecraft gameplay systems using Java and the Fabric API, including state-driven items, temporary effects, and enchantment mechanics.
- Used custom NBT data to persist item states, track progression, and manage behavior across item lifecycles.
- Implemented effect pipelines that update player attributes and item metadata across activation, expiration, and multiplayer interactions.
- Designed multi-stage consumable mechanics with reward scaling, shared-player interactions, and experience distribution logic.
- Contributed to the project through iterative feature development, Git-based collaboration, debugging, and code review, helping expand the mod's functionality and overall player experience.

**RU Scary Burger**, Restaurant POS App | March 2025 - May 2025

Java, JavaFX, Android Studio, JUnit, Gradle

- Built a restaurant ordering app with dynamic UI updates, persistent mock database storage, and order management functionality.
- Designed application architecture with UML class diagrams before implementation.
- Wrote JUnit tests to verify application logic and used Gradle for build configuration and dependency management.
- Documented the codebase with JavaDocs and collaborated through GitHub feature branches and merge conflict resolution.

**Personal Site**, Website | May 2026 - *present* | <https://michaelbabboni.com>

React, TypeScript, HTML, CSS, Tailwind CSS

- Built and deployed a responsive portfolio website with interactive UI elements resembling an operating system to showcase software, game development, and other creative projects.

## WORK EXPERIENCE

**Host** | Franklin Steakhouse and Tavern | Fairfield, NJ

August 2020 - *present*

- Supported front-of-house operations in a fast-paced restaurant environment by managing guest seating, coordinating reservations and wait times, completing online and call-in orders, and helping maintain smooth service during high-volume shifts.
- Served as a key point of contact for guests, using strong communication, multitasking, and problem-solving skills to create a welcoming experience and support the restaurant team.
